# Web Applications

Exploring the digital tools that shape our daily lives

Why Web Applications ?

I decided on this subject because web applications are part of our daily lives, and they are very important in technology today.

What Is a Web Application?

Una aplicación web es un programa que funciona en internet a través de un navegador.

Browser-Based	Internet-Powered	Cross-Platform

Examples You Use Every Day
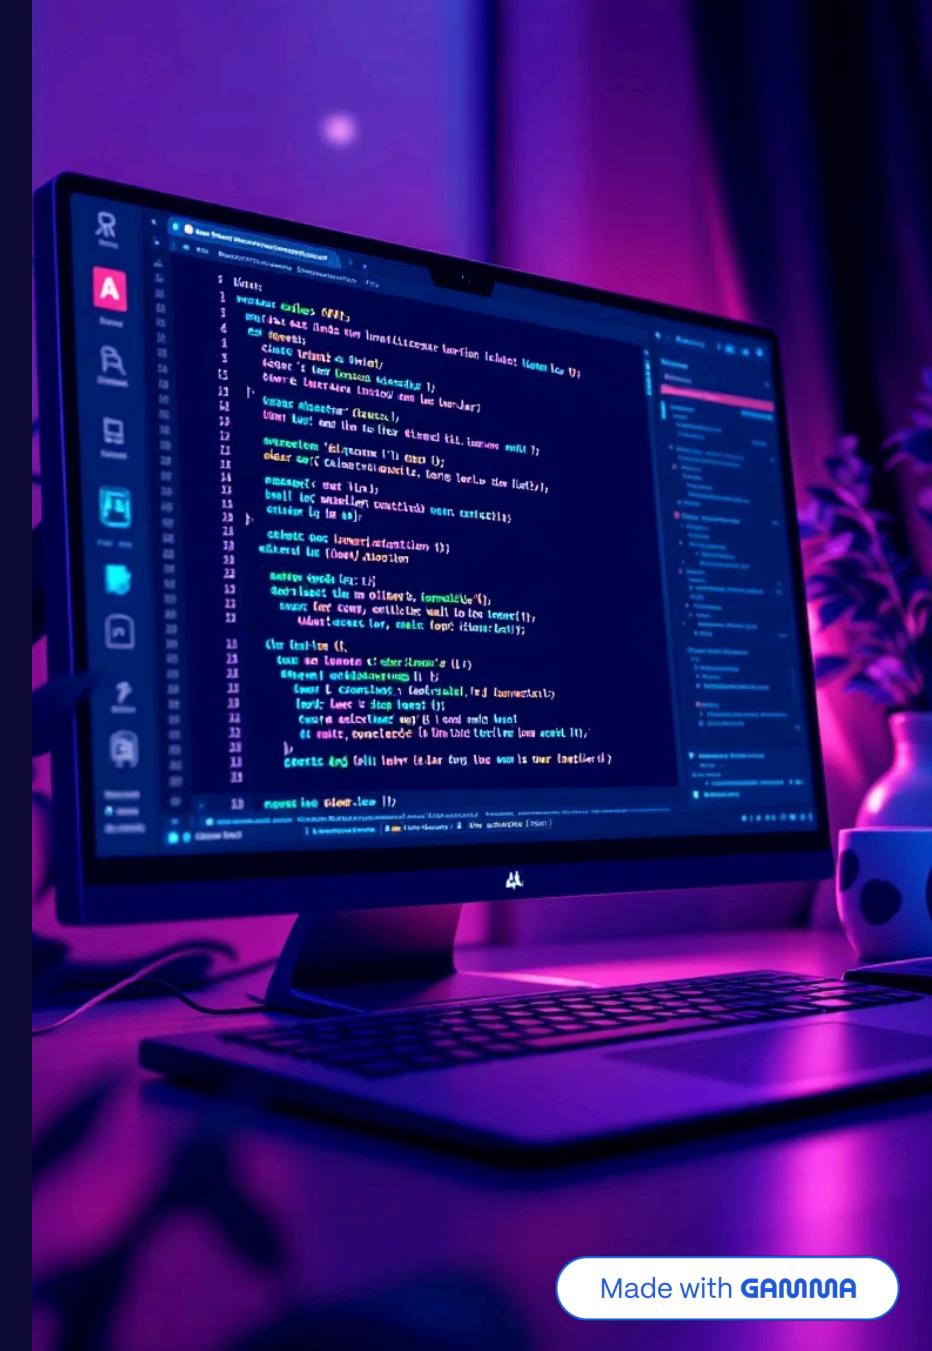

Online Shops

Social Networks

Email Services

Learning Platforms

By studying this subject, I hope to learn how web applications are created, how they work, and how they can help solve real problems.

The Future Starts Here

In the future, this knowledge will be very useful for my professional career and personal projects.

Thank you for joining this exploration of web applications!
